Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 14, drawn to a process for absorbing moisture from food, classified in class 427, subclass 356.
 - II. Claims 15 – 22, drawn to a process for manufacturing a container, classified in class 162, subclass 123.
2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the container of the combination is not required to be a boxboard. The subcombination has separate utility such as a container that is not specifically designed for the absorption of moisture.
3. Because these inventions are distinct for the reasons described above, and have acquired a separate status in the art because of their recognized different classification and subject matter, and because the searches required for the groups are not the same, restriction for examination purposes as indicated is proper.

Art Unit: 1772

4. A telephone call was made to Mr. Frank Chau on August 20, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
